## Experience

### **WWW ENGINEER, npm, inc., OAKLAND, CA – 2015-PRESENT**

Working remotely from Seattle: maintain and build features for [npmjs.com](http://npmjs.com). This requires knowledge of JavaScript, both Node.js and browser-based, as well as a lot of CSS. The project is open source on Github.

### **DEVELOPER, FILAMENT GROUP, BOSTON, MA - 2012-2015**

Working remotely from Seattle: Built frontend layouts/templates for clients. Ran workshops to teach clients about Responsive Web Design and how to develop for it. Performed performance analysis and breakdowns for clients. Created reusable JavaScript libraries and CSS/HTML modules. Maintained multiple open source libraries (mostly written in Node or Phantom). Handled Ops-related development, including deployment, CI, and build tools (Using Vagrant, Chef, Jenkins, and internal build-tools to help create sites more soundly)

### **PRODUCT ARCHITECT, UI EVOLUTION, SEATTLE, WA – 2011-2012**

Lead developer and project planner on new web projects. Develop sites and RESTful apis for large clients that were focused on mobile users. Help create a mobile strategy for businesses. Staff a growing web team.

### **SOFTWARE DEVELOPER, UI EVOLUTION, SEATTLE, WA – 2010-2011**

Developed mobile applications and web applications for clients including AT&T and Disney.

### **JUNIOR WEB DEVELOPER, MEDWIZ TECHNOLOGIES – 2010-2010**

Worked on a tablet-focused web application for long-term health care facilities developed in Ruby on Rails. Fixed bugs and added new features using Ruby, Rails, jQuery, and CSS.

## Education

Ohio State University – B.S. Computer Science, 2010

University of Washington - B.A. Political Economics, 2006
